

Stacey J. Kiprop

Data Science Student | ML-DL |
Aspiring writer | Ethics and critical
thinking enthusiast

Profile

Data Science student specializing in Machine Learning and Deep Learning, with a proven track record of building high-accuracy diagnostic tools and facilitating community-focused mentorship. Committed to developing ethically-grounded AI solutions that solve real-world health and social challenges.

Technical Projects & Experience

May - Aug 2026

KCA University, Nairobi

Sickle Cell Early Diagnosis Tool

- Developed a CPU-optimized, deep learning tool for Kenyan hospitals that classifies blood smear images with 91.39% accuracy.
- Utilized PyTorch, OpenCV, and Streamlit to create an offline diagnostic interface featuring automated quality checks and confidence-based clinical alerts.
- Achieved 97% negative recall through strategic data augmentation and weighted sampling, ensuring high reliability for screening healthy patients.

Jan-April 2026

Deliverance Church International Umoja

Transitional Program Volunteer

- Guided high school graduates through a comprehensive "University Bridge" program, resulting in improved student confidence and informed degree selection.
- Delivered one-on-one career counseling, helping students evaluate their career goals and academic strengths to ensure a strategic fit for their university applications.
- Mentored students on the transition process, providing peer-led insights into campus life, administration, and academic expectations.

Education

- **KCA University**
Bachelor of Science in Data Science
Expected graduation:
2028

Skill

- Languages: Python, SQL.
- ML/DL: PyTorch, TensorFlow, Scikit-learn.
- Data/Web: Pandas, NumPy, Streamlit, Matplotlib.
- Tools: Git, GitHub, Data Structures & Algorithms.

Activities

- Member, University Data Science Club
- Member, Women in Tech Club
